

Experience Cinema-Quality Sound with Sonos Arc Ultra

Built with first-of-its-kind transducer technology, Arc Ultra provides boosted bass, a spine-tingling spatial audio experience with Dolby Atmos®, and advanced Speech Enhancement for even more levels of control — all in a sleek package that blends into your space and complements large TVs.

- **Debating Sound Motion™:** Arc Ultra leverages all-new technology that drastically reduces the size of its woofer while doubling its bass output compared to Arc, opening a new chapter in sound innovation where bigger, better sound can be delivered from smaller products.
- **Theater Sound in Your Living Room:** Arc Ultra delivers a massive sound stage that precisely places every detail of sound in your room to envelop you in content. The all-new architecture features 14 Sonos-engineered drivers, including a Sound Motion™ woofer and a cluster of tweeters with waveguides on both ends to deliver a 9.1.4 spatial audio experience. Tune with Trueplay™ to pinpoint the best sound for your space, now available for both iOS and Android.
- **Never Miss a Word or Whisper:** With a new center channel architecture, Arc Ultra maximizes vocal clarity so it's easier to follow dialogue. An all-new advanced Speech Enhancement feature lets you choose your preferred level of dialogue clarity in the Sonos app.
- **Cinematic Collaborations:** Arc Ultra is the product of deepened Sonos Soundboard relationships. We worked with veteran TV and movie creators like Chris Jenkins and Onnalee Blank to fine-tune Arc Ultra for Dolby Atmos content playback and assemble a studio-worthy experience that rivals professional sound systems.
- **Design Worthy of Your Home:** Arc Ultra is thoughtfully crafted with a distinctive curved profile, matte finish, and a slimmer appearance that looks elegant when mounted and doesn't obstruct TV bezels when placed on a credenza. Its wrap-around grille extends around the back of the speaker so sound can travel in every direction to completely surround you.
- **Seamless Setup and Control:** Unlock theater-quality sound in a matter of minutes with a simple HDMI eARC connection and effortlessly control with your TV remote, the Sonos app, Sonos Voice Control, or Amazon Alexa. Touch controls are cleverly housed in a dedicated ledge behind the soundbar to prevent visual distraction, and Bluetooth support gives you more ways to stream.
- **Committed to Sustainability:** Arc Ultra was designed responsibly with improved serviceability by using more screws and fewer adhesives, halogen-free PCB materials, less silicon material, and a reduced idle power consumption by as much as 20% as a standalone compared to Arc. Arc Ultra's packaging is 100% recyclable and also 18% smaller in volume, making it more efficient to ship.

Audio

Amplifiers

Fifteen Class-D digital amplifiers perfectly tuned to the soundbar's unique acoustic architecture.

Tweeters

Seven precisely angled silk-dome tweeters create crisp high frequencies and clear dialogue. Two fire upward to create dedicated height channels for spatial audio.

Midwoofers

Six woofers ensure faithful playback of mid-range frequencies.

Woofers

Leveraging Sound Motion™, a proprietary four-motor, dual-membrane woofer delivers exceptional bass in a revolutionary flat, compact design.

Microphones

The far-field microphone array uses advanced beamforming and multichannel echo cancellation for quick and accurate voice control and Trueplay tuning. Disconnect by toggling off the mic switch.

Speech Enhancement

Choose your preferred level of dialogue clarity in the Sonos app.

Night Sound

Reduce the intensity of loud sounds and enhance quieter sounds via the Sonos app.

Dolby Atmos

Enjoy sound beyond surround with supported services and devices.

TV Audio Swap

Press the Content Key on Sonos Ace to swap sound from Arc Ultra to the headphones for a private cinema experience.

Adjustable EQ

Use the Sonos app to adjust bass, treble, and loudness.

Trueplay

This software measures the acoustics of the room then fine-tunes the EQ. Compatible with iOS and Android devices.
