

RØDELink™ RX-CAM

WIRELESS CAMERA-MOUNTED RECEIVER

The RX-CAM is a camera-mounted wireless receiver for the RØDELink digital wireless system. It features an OLED display with information on level, battery status, mute and channel selection. The unit can be mounted on a standard camera shoe mount, 3/8" thread or belt-clip, and for added versatility the shoe mount can be fixed in one of two positions.

- Series II 2.4GHz digital transmission
- 128-bit encrypted signal
- Up to 100m range
- OLED digital display
- 3 level gain control
- AA battery or USB power
